Examiner Emulator Devices List

507 Andrea Lazzarotto Tue, May 21, 2024 Examiner Emulator. 0 3829

Examiner Emulator is compatible with the following devices:

- VCI Pod
- microPod II
- Mopar Diagnostic Pod

All the devices guarantee the same functionalities.

The Examiner Emulator can only use the USB port connection. No other connection types are provided for technical reasons.

	VCI Pod	microPod II	Mopar Diagnos
Examiner Emulator Compatibility	YES	YES Only if not registered with wiTECH 2.0	YES Only if not regis 2.0
wiTECH 2.0 Compatibility	NO	YES Must be registered with wiTECH 2.0	YES Must be register 2.0

MicroPod II and Mopar Diagnostic Pod device must not be registered with wiTECH 2.0 in order to work with Examiner Emulator.

A device will no longer be compatible with Examiner Emulator after it is registered with wiTECH 2.0, and it is not possible to convert a device to be used with Examiner Emulator again.

We highly recommend assigning a dedicated microPod II or Mopar Diagnostic Pod device to be used with Examiner Emulator when needed.
